MIMS-SUTRO CO.

Incorporated. Paid Up Capital \$50,000.

"The Goldfield Brokers That Have Made Goldfield's Gilt-Edged Securities Famous."

Goldfield, Nevada

We Are Engineering The Goldfield Successes

Goldfield, the Treasure Vault of the World, Is Making Fortunes for Our Army of Followers

OUR UNPARALLELED GOLDFIELD RECORD

400 per cent Earned by our Clients in Sandstorm Mining Shares.

350 per cent Earned by our Clients in Orig. Bullfrog Mining Shares.

200 per cent Earned by our Clients in Blue Bull Mining Shares.

150 per cent Earned by our Clients in Black Butte Mining Shares.

112 per cent Earned by our Clients in Goldfield Mining Co. Shares.

87 per cent Earned by Our Clients in Jumbo Mining Shares.

The Mims-Sutro Company is the fiscal agent for the great gold producing mines of the Goldfield district. It is incorporated, with a paid-up capital of \$50,000.

Every bank and banker in Southern Nevada vouches for its integrity, business methods and financial standing.

Its references, by permission, are the Nye and Ormsby County Bank of Goldfield, Tonopah and Carson City, and John S. Cook & Co., Bankers, of Goldfield, Nevada.

The Mims-Sutro Company, as fiscal agents, disposed of thousands of shares of the now famous Sandstorm mine of Goldfield, at 15 cents per share last summer. It is now selling above 75. (See San Francisco and New York stock quotations.)

The Mims-Sutro Company, as fiscal agents, let its clients have thousands of shares of Original Bullfrog at 8 cents. It is now selling around 40.

The Mims-Sutro Company, as fiscal agents, sold thousands of shares of Blue Bull at 10 cents. It is now swimming above 30.

It sold Jumbo at 39 cents. Jumbo is now 80. It sold Goldfield Mining

Company at 40 cents, and it has advanced above 88. It has performed the same operation with twenty other securities.

As fiscal agent for great Goldfield mining companies and general broker for Goldfield mining men, it secures capital for the exploitation of enterprises and the development of properties that its corps of mining engineers pronounce meritorious. It earns its profits in commissions, and the volume of its business transactions is such as to insure generous profits.

The company is in business to make money, but it is sufficiently far-sighted to realize that the volume of its business can only increase if its clientele profits along with the company.

Money is needed for development purposes and the Mims-Sutro Company secures it.

Money is wanted only because the gold properties of Goldfield are so numerous that it takes a world of capital to float all the worthy propositions. Men on the ground are re-investing as fast as they realize profit on their investments, but the world never saw such a gold-producing district as this; and as most of the Goldfield discoveries are of recent origin, sufficient time has not yet elapsed to secure the necessary flow of practically unlimited capital needed. That time is approaching very rapidly, however.

OFFICERS

HON. GEORGE S. NIXON President

U. S. Senator from Nevada and General Manager of the Nye and Ormsby County Bank of Tonopah and Goldfield.

W. J. DOUGLASS Vice-President

Superintendent of the Tonopah Mining and Mining Company, and an Officer of a Dozen Other Successful Mining Companies.

S. H. KITTO Treasurer

Cashier of the Nye and Ormsby County Bank at Goldfield.

The Great Kawich

The Kawich mountain range, 70 miles east of Goldfield, has been the scene of more great gold strikes within three months than any other mining district in the United States. Ore assaying from \$100 to \$25,000 per ton has been brought from Kawich into Goldfield, and a stampede for the Kawich country has resulted. Ore has been found on the surface at Kawich in the outcroppings of a dozen ledges, which show more free gold than any rock ever brought into camp. Chunks of ore have been brought from the district that are literally alive with gold.

The Kawich Gold Mining Company is the sole owner of 200 acres right in the midst of the territory where these great discoveries have been made. Its property adjoins the town site.

It owns ten claims. They are located on the west slope of Kawich Mountain, and were discovered at the same time as the original discoveries were made on the east slope.

There is at least one gold bearing ledge on each of the ten claims of the Kawich Gold Mining Company.

Fabulous Ore Values

Assays made from ore samples of the property show the existence of some of the highest grade ore that has been uncovered in Nevada during the past five years.

Although the Company has only been in existence a few weeks, a large body of men have been despatched to the scene and are now busy sinking shafts and otherwise developing the property into what gives signs of becoming one of the greatest producers Nevada ever had.

A dozen experts have examined the property at the request of the Company's officials, and all are of the opinion that the geological formations are identical with those found in Goldfield that have produced within a year over \$4,000,000 of high-grade gold ore. The surface showings are absolutely the same as those in evidence in Goldfield.

Free gold is plainly visible in the strata. The formation throughout is gray crystallized quartz, very strong and highly mineralized. It carries gold sulphides and more or less iron. The property shows up magnificently considering the amount of development work that has been possible of accomplishment to date.

Present indications are that the entire district of the Kawich will run Bullfrog and Goldfield a close second, if indeed, it does not eclipse them. Within sixty days 700 men have gone into the Kawich district to work the properties there. Lessees who are working on other properties in the neighborhood have encountered ledges in trenching from which ore has been taken that has assayed from \$200 to \$10,000 per ton.

Bonanza values are being found in every direction, and the property of

this company sits firmly in the centre of the entire section where these showings are found.

In the Heart of the Mineral Zone

Beyond a question the 200 acres of the Kawich Gold Mining Company are situated in the best part of Nevada's newly discovered mineral zone.

Standing on the top of the New England claim of this company one can see for miles around in every direction mining claims staked out and a tremendous work being done by men who originally staked out claims that have been developed into Goldfield's greatest gold producing mines. They are old prospectors who are used to passing over miles of territory without stopping for half an hour, so absolute and unerring is their judgment of a good gold mining prospect. Here at Kawich they have located and here they announce to the world that they have found another Goldfield.

Among them "January" Jones, a man who became famous as one of the original owners of the January mine, the property of the Goldfield Mining Company, that produced half a million dollars' worth of shipping ore during the first year of its existence in Goldfield.

Another who has centered his recent endeavors in Kawich is Malcolm L. McDonald, general manager of the Southwestern Nevada Mines Co., which has refused \$50,000 for its mine recently. Mr. McDonald is also part owner of the great Simmerone mine of Goldfield, which has shipped by express out of Goldfield, within thirty days, ten tons of ore worth \$200 per ton, and has uncovered a vein of inestimable gold producing possibilities.

Foremost among all those who have interested themselves at Kawich is United States Senator George S. Nixon. The Senator's Kawich interests are represented by this company. Mr. Nixon was one of the original owners of the Sandstorm Mining Company of Goldfield, whose stock is now selling above 70, and of a dozen other Goldfield and Tonopah properties whose stock has quadrupled in market values during the past year.

Dividends in Sight

700,000 shares of the 1,000,000 of capital stock are held by the officers of the Kawich Gold Mining Company, and they have been pooled and will not be placed upon the market under any conditions for a long period. 300,000 shares comprise the treasury stock. 80,000 of these are owned to the public at 25 cents per share for the purpose of defraying the expenses of early development.

There are an unusual number of quartz-bearing ledges on the 200 acres of the Company's property, and cost of development will be heavy, but it is not believed that another dollar will be needed to defray the expenses of mining. Shipping ore is in sight and, before the money realized by the sale of these 80,000 shares is spent, it is confidently believed that money will be realized from ore shipped out of the mines to the smelters. This will be used for the further development of the property.
